# What's the right window covering for YOU

## Prefer a clean, uncluttered look?

Consider blinds, shades or solar screens with motorized option for a modern look and function.

## Need flexible light control?

Consider blinds with multiple slat sizes or a shade with Top-Down/Bottom-Up lift style

## Need more privacy?

Shades with room darkening fabrics or privacy liners and blinds with no-hole routing offer maximum privacy.

## Have children or pets?

OEKO-TEX Standart 100-certified fabrics available. Ideal for allergen free homes.

## How to MEASURE

quickly and accurately

### Inside Mount

For a beautiful framed look

#### MEASURE WIDTH

Measure to the nearest  $\frac{1}{4}$  inch surfaces of window frame; at the top, middle, and bottom. Order the narrowest width.

#### MEASURE HEIGHT

Measure to the nearest  $\frac{1}{4}$  inch from inside surface at top of window to top of sill; at the left, middle, and right. Order the longest height.

#### MEASURE DEPTH

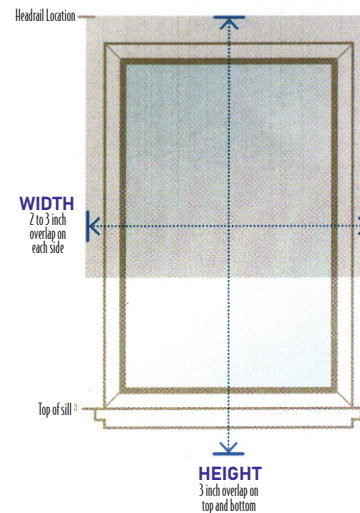

Measure exact depth of window casing making note of any hardware or mechanical obstacles i. e. handles cranks or tracks that could interfere with the shade.

#### HELPFUL TIPS

- \* Always use a metal tape measure as cloth may stretch
- \* Measure your window, not your existing blind or shade
- \* Measure each window separately even if they appear to be identical

### Outside Mount

For increased light control & privacy

#### MEASURE WIDTH

Measure to the nearest  $\frac{1}{4}$  inch between outer most points where shade is to be placed. Measurement should overlap each side of window frame by at least 2 to 3 inches.

#### MEASURE HEIGHT

Measure height from the top of where the shade will be located to the top of sill, or measure to point of desired shade length if no sill. Measurement should overlap window by at least 3 inches on the top and bottom.

#### NOTE:

DO NOT take any deductions. The factory will make the necessary adjustment.

## CONTROL OPTIONS

### MOTORIZED LIFT

Raise and lower shades individually or as a group with the touch of a button. Simple, easy to use, and ideal for homes with children and pets.

### CONTINUOUS-LOOP LIFT

Cord loop raises and lowers the window treatment. Can be pulled from anywhere you can reach it.

### CORDLESS BOTTOM UP / TOP DOWN

Let in natural light while maintaining privacy by lowering the shade from the top. Or lift the shade completely for a full view to the outside.
